

Kindred Path
FERTILITY CENTRE

FREE PLANNER · LAGOS, NIGERIA

The questions to ask before you pay for anything.

What fertility treatment actually costs in Lagos, what makes the number move, and how to tell a real quote from an optimistic one.

A FULL IVF CYCLE USING YOUR OWN EGGS, HONESTLY ADDED UP

from N3,078,000

Consultation, tests, treatment cycle and medication. Most clinics quote you only the third of those.

Prepared by Kindred Path Fertility Centre, which manages the Institute of Fertility Medicine at Lagos State University Teaching Hospital.

01 · WHERE THE MONEY GOES

One number, four parts.

When a clinic quotes a single IVF figure it almost always means the treatment cycle alone. Here is the same information with nothing left out.

Proportion of the total cost of one cycle

Consultation

Tuesdays and Thursdays

N30,000

Laboratory and diagnostic tests

Both partners assessed

N300,000

IVF using your own cycle

Retrieval, embryology, transfer

N1,248,000

Medication

From. Varies with your response

N1,500,000

REALISTIC TOTAL, ONE CYCLE, OWN EGGS

Using a donor cycle instead: from N3,830,000

from N3,078,000

These totals assume one cycle. Some people need more than one, and any clinic worth trusting will tell you that before you begin rather than after.

Nine questions. Ask all of them.

Take these to any clinic, including ours. That is the point of them.

— On the quote

- 1 Does this figure include laboratory tests and medication, or the treatment cycle only?
- 2 What happens to the cost if my cycle is cancelled before egg retrieval?
- 3 Is embryo freezing included, and what does storage cost per year?
- 4 What would a second cycle cost, and is any part of it discounted?

— On success rates

- 5 Is that a clinical pregnancy rate or a live birth rate? They are very different numbers.
- 6 Is it per cycle started, per egg retrieval, or per embryo transfer?
- 7 What is the rate for someone of my age specifically?

— On the plan

- 8 Why this treatment rather than a simpler or cheaper one?
- 9 What are the realistic chances that this does not work?

IF A CLINIC CANNOT ANSWER THESE CLEARLY

The number they quoted you does not mean very much. That is not rudeness on your part. It is due diligence on a decision this size.

03 · WARNING SIGNS

Five things that should worry you.

None of these mean a clinic is dishonest. All of them mean you should ask more before you pay.

Any guarantee of a baby

Nobody can offer this honestly. Not one clinic, anywhere in the world.

Pressure to decide or pay today

A treatment costing millions of naira can wait a week while you think.

Add-ons that improve your chances

Ask for the published evidence. If there is none, there is no reason to pay.

A refusal to put costs in writing

If they will not write it down before you commit, ask yourself why.

Success rates with no age band

A percentage without a denominator is marketing, not data.

You are allowed to ask all of this. A clinic that treats your questions as a nuisance is telling you something useful about how it will treat you later.

04 · YOUR FIRST APPOINTMENT

What to bring with you.

Bring what you have. Nobody is turned away for arriving without paperwork.

☐

Any previous test results, scans or discharge summaries, however old

☐

A list of medications you both currently take

☐

Rough dates of your last few menstrual cycles

☐

Any previous fertility treatment records, including cycles that did not work

☐

Your partner, if you have one. Assessment involves both of you

☐
